

# Career and Learning Plan

Muhammad Rizky Alifian  
Full Stack Web Development  
Batch 4

# Defining Goal

I want to get a new job as a **Digital Marketer**  
(shifting career)

## 1 Why do you want this goal so bad?

I want to become a good Fullstack Developer because, the world is currently moving towards an internet-based / digitally-driven industry, and I intend to fully embrace this change by learning and mastering skills that are currently in demand during this industrial revolution.

## 2 What do you want to achieve for the next 6-12 month?

I want to work in the Programming industry, mainly as a fullstack developer or a machine learning developer with around Rp 8.000.000 – 10.000.000 salary and the skills to back it up.

## 3 What do you need to achieve those target?

### Hard Skills

Frontend Development Mastery, Backend Development Mastery, Data Analysis Mastery, and UI/UX Design Mastery

### Soft Skills

Leadership, Team Management, and Project Management

### Supporting

Frontend, UI/UX, and Backend Development related portfolios, Networking within the programming scene, and experience gained from internships both project-based and traditional.

# Knowing Yourself

I want to get a new job as a **Digital Marketer**  
(shifting career)

## 4 What are the negative self concepts that I have:

### Self Concept 1

The market is saturated with developers looking for a job, and I'm afraid I can't compete.

### Self Concept 2

I am very bad at convincing people in general, let alone convincing people in a business meeting or project proposal meeting.

### Self Concept 3

Languages in programming is quite vast, and not all companies use the same language in their development

## 5 My strategies to change my self concept to be better

### Strategy 1

- Build a stronger portfolio to stay on top of the game (freelancing/internships)
- Join communities to observe the job-seeking scene in the programming industry

### Strategy 2

- Work on public speaking skills, and how to deliver clear, concise, and informative dialogues.
- Network with people that already have skills in convincing people and learn from them.

### Strategy 3

- Do my due diligence and look into which companies use which languages in their development and work towards mastering the language of the company I wanted to join uses.

# Knowing Your Strengths and Weaknesses

I want to get a new job as a **Digital Marketer**  
(shifting career)

## 6 To Support my Goal I Have Strength in

### My Strength

- I am very passionate towards programming
- I am good with logic
- I am very focused when working on something
- I am great at working with people in a team
- I am very tech savvy and keeps up with updates within the tech industry
- I strive for versatility
- I am very good at problem solving

### Benefit

- Gives me drive to grow in this industry
- Enables me to translate a set of instructions into lines of program
- Increases efficiency when working on a project
- Helps me socially in terms of professional life
- Always possessing knowledge on the newest updates within the tech industry.
- Gives me drive to learn about each programming language for versatility
- Enables me to effectively and efficiently troubleshoot problems.

**Strength is** anything can help you to achieve your goal easier or faster it's including **personal factor** such as personality, habit, interest, intelligence, knowledge, or **non-personal factor** such as time availability, access to learning facilities, network, money, anything

# Knowing Your Strengths and Weaknesses

I want to get a new job as a **Digital Marketer**  
(shifting career)

## 7 But I'm also having weaknesses or obstacles

### My Weakness or Obstacle

I constantly compare myself with my peers

I am reluctant to leave an environment that I'm currently working in, even though the working conditions and/or environment is terrible

My time management is a mess

My major doesn't align fully with what I want to do

I don't have much drive for something that doesn't interest me

I never have a fixed schedule for myself, always a flexible one

I am very bad at multi-tasking

### Impact

Makes me question myself and what I do

Hinders me from reaching out for new opportunities

Sacrifices a lot of other things just to meet the deadline of projects

Handicaps me in terms of what skillset fresh graduates in this industry already have

Forces me to be always working on something interesting and prevents me from learning new things.

Makes it hard for other people to work together with me on certain tasks

Forces me to do tasks one by one if I want them done properly.

**Weakness or Obstacle is** anything can disturb you to achieve your goal, make it slower or harder to be achieve. it's including **personal factor** such as personality, habit, interest, intelligence, knowledge, or **non-personal factor** such as time availability, access to learning facilities, network, money, anything
